THE CLONE WARS TURNS 20

'When the *Clone Wars 2D micro-series* premiered in 2003, its action-packed story arc, engaging characters and vibrant animation received wide acclaim from critics and *Star Wars*™ fans alike. The series paved the way for a whole new era in *Clone Wars* storytelling, including seven full seasons of the animated series *Star Wars: The Clone Wars* (2008-2020). The *Venator*-class Republic Attack Cruiser features in some of the most monumental scenes of the Clone Wars era, culminating in the Siege of Mandalore and the fateful Battle of Coruscant. We know that an Ultimate Collector Series version has been on LEGO® *Star Wars* fans' wish lists for a long time, so without further ado, please join us on this model's maiden voyage to commemorate twenty years of epic Clone Wars action.'

Enjoy building!

Jens Kronvold Frederiksen
Design Director & Creative Lead,
LEGO® Star Wars™

THE JEDI™ CRUISER

The Venator was the first class of Star Destroyers designed and manufactured by Kuat Drive Yards. Built to transport over 400 starfighters across the galaxy, it was a crucial asset to the Galactic Republic fleet. In the hands of the Jedi Masters, this engineering masterpiece served as a forceful fighting ship and starfighter carrier in naval operations during the Clone Wars. After the fall of the Republic, Venators were incorporated into the Imperial fleet. A menacing testament to the power of the Empire, their design ultimately inspired another classic: the colossal Super Star Destroyers.

With a length of 1,137 meters, a height of 268 meters and a width of 548 meters, the *Venator*-class Republic Attack Cruiser can accommodate a small city: 7,400 personnel, 2,000 troops, 7,000 tons of cargo and two years' worth of food supplies.

The bridge is designed for multiple specialised functions: the starboard-side bridge holds the command centre, and the port-side bridge serves mainly as starfighter operations centre.

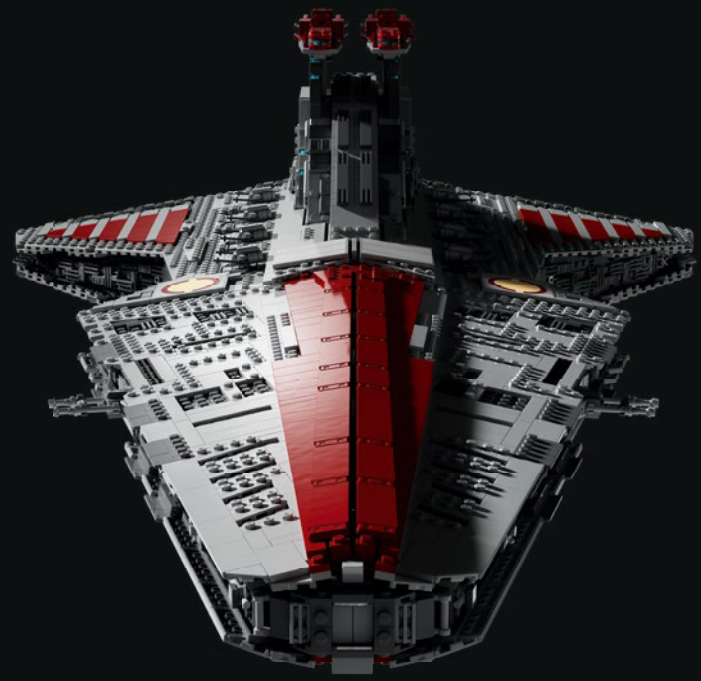
Speed
- 945 km/h in atmosphere
- 3,000 g acceleration
- 40,000 tons of fuel per second at maximum speed

Armament
- 8 DBY-827 heavy turbolaser turrets
- 4 Proton torpedo launchers
- 6 Tractor beam projectors
- Beam weapons
- 52+ Point-defence laser cannons
- 2 sets of medium dual turbolasers

© & ™ Lucasfilm Ltd.

RECREATING A CLONE WARS ICON

The LEGO® *Venator*-class Republic Attack Cruiser is a true heavyweight addition to the Ultimate Collector Series. The familiar Kuat Drive Yards wedge-shape, the signature Republic Red stripe and the double bridge make it instantly recognisable throughout the many battles of the Clone Wars as a commanding force across the galaxy – and on your shelf. The miniature scale model of a Republic Gunship in the port-side hangar emphasises the sheer magnitude of the starship. Tinted panorama windows in the bridge exude determined action, the enormous ion thrusters create an illusion of motion and the turbolaser turrets are positioned for attack. The Captain Rex and Wullf Yularen minifigures come with a separate display stand. Both are exclusive to this set, with all-new helmet, torso and head designs to capture the unique traits of these charismatic and central characters in the saga.



Hans Burkhard Schlömer,
LEGO® *Star Wars*™ Model Designer

Jens Kronvold Frederiksen
Design Director & Creative Lead,
LEGO® *Star Wars*™

DESIGNING FOR OUR GALAXY

'This is the first time we're releasing the *Venator*-class Republic Attack Cruiser at this scale – in fact, it's almost twice as big as the LEGO® *Star Wars*™ 8039 *Venator*-class Republic Attack Cruiser from 2009. With models this size, we can really dive into every detail, and this is no exception. With every LEGO brick and element, we wanted to create a faithful replica of the original, and an engaging build experience that would do *The Clone Wars* series justice. No prop versions of the Venator were made for the filming of *Revenge of the Sith* or *The Clone Wars* series, it was all CGI, and details like the red stripe evolved over the seven seasons, so this model incorporates details from different versions. For the main engines, we used the large wheel elements to save weight, provide details and optimise building time, and the titanium metallic colour completed the look. The hull panels and skeleton are unlike anything we have created before, with different orientations and connection points with the internal frame. The centre frame had to be strong enough to absorb the pull from the tail weight – an unsupported overhang clocking in at over one kilo!'

Hans Burkhard Schlömer,
LEGO® *Star Wars*™ Model Designer
